

**YOUNGMAN<sup>®</sup>**

---

**INDUSTRIAL  
CUSTOMIZED  
SOLUTIONS**

Youngman has been working with ladders and scaffold systems for more than 95 years and provides solutions for a safe and pleasant access to unique and challenging to reach working spaces. Our success with our standard programme reflects our expertise, which also serves as the foundation for YOUNGMAN'S unique service offering of Customised Aluminium solutions.

It is vital to get to higher altitude locations quickly and safely during routine operations. Every business needs unique, adaptable solutions that are tailored to their particular demands because of this.

## From The On-Site Investigation To The Ideal Resolution

A situational assessment is carried out on-site at the start of every project. Together with the customer, the technicians at YOUNGMAN establish a general understanding of the situation. Face-to-face consultations are essential to our ability to create a solution that is reliable, economical, and satisfies all of your needs. Thus, the importance of the on-site analysis to YOUNGMAN.

This study serves as the foundation for creating a practical design that will be improved through interaction with the user to create a custom structure that will then be created on our cutting-edge production equipment at our production locations.

We deliver the finished product, execute the acceptance, and, if necessary, install the gadget on-site.

Customised solutions made of aluminium for industry & systems engineering

Buses, trains & commercial vehicles

## Youngman Consulting Competence

From the first analysis to our after-sales service - we offer a one-stop service

You may get all your needs met thanks to YOUNGMAN's consulting experience. From analysis to design, implementation, and services, our professionals will handle your concerns in a professional manner and have years of experience.

Project reports customised solutions

The first step is to analyse the current condition on the job site, and after that, we'll talk with you about the goals that need to be achieved. In a subsequent step, our team creates a project plan based on the preliminary data and in close consultation with you. The implementation is the third step. Since we value transparency, YOUNGMAN will always keep you informed of the project's status. Finally, our SafetyServices provide an after-sales.
